

**PROJECT MANAGEMENT / PROGRAM MANAGEMENT PROFESSIONAL**

**Dynamic Project & Program Management leader** with 26+ years of **client-facing success** across **IT Infrastructure, Automobile, and Telecom applications**. Proven expertise in **Agile transformations, strategic planning, quality management, and data analytics**, complemented by **strong coaching and mentoring skills**. **German Level-2** certified, with a track record of driving complex deployments and delivering measurable business impact.

---

**PROFESSIONAL EXPERIENCE**

**Jan 2026 – Till date**  
**PMO / Business Analyst, Hertz**

**Kyndryl**

**Chennai, INDIA**

Provided PMO support for the Hertz programme by managing end-to-end processes, including RAID governance, project planning, and claim reporting. Ensured delivery transparency, compliance, and stakeholder alignment through structured controls and reporting.

Accomplishments

- Established and governed standardized PMO processes across Hertz, including end-to-end RAID, PCR, and project planning SOPs, client-facing governance consistency.
- Owned and operationalized the integrated RAID Log, enabling proactive risk and issue management, clear escalation paths, and effective decision tracking across all Hertz workstreams.
- Prepared and validated accurate weekly claim reports, collaborating with workstream leads to resolve discrepancies and ensure compliance with contractual and financial controls.
- Developed and maintained consolidated project plans and roadmaps, aligning cross-workstream dependencies, milestones, and delivery timelines to support Hertz transformation objectives.
- Acted as a central PMO coordination point, driving stakeholder alignment, improving delivery transparency, and strengthening governance cadence through structured reporting and reviews.

Tasks / Responsibilities

- Managed end-to-end PMO processes for the Hertz programme, ensuring consistent governance across RAID, change control, project planning, and claims management.
- Owned and governed the RAID log lifecycle, driving timely identification, validation, escalation, and closure of risks, issues, actions, dependencies, and decisions.
- Developed, maintained, and tracked integrated project plans and roadmaps, ensuring alignment of milestones, dependencies, and delivery commitments across workstreams.
- Coordinated and validated weekly claim reports with workstream leads to ensure accuracy, compliance, and timely financial submissions.
- Administered and governed Jira and Confluence to track delivery progress, actions, and RAID items, ensuring data quality, ownership, and reporting visibility for Program Management Office along with PMO documentation, including SOPs, templates, governance artefacts, and programme knowledge.
- Acted as the central PMO coordination point, enabling transparency, stakeholder alignment, and effective decision-making across the Hertz transformation programme. Running the Demo sessions on the Tools to the customers.

**Nov 2024 – Aug 2025**  
**Sr. Project Consultant, Menzies**

**Kyndryl**

**Chennai, INDIA**

Driving end-to-end Tooling requirements and the Knowledge Transfer to the BAU team for the Transition and Transformation project for the logistic provider Menzies.

Accomplishments

- Completed Key Milestones and delivered the Zabbix, iAIOps and Ansible part of the Project for the POC servers.
- Completed the POC and Event 1 milestones for the customer for the Tooling aspects of the Project.

- Appreciated by the Program Manager for the delivery and the support in end-end handling of the Procurement for the Cloud Hosting Tower as a stretched assignment, for learning it and executing it in a short span of time.

#### Tasks / Responsibilities

- Driving end-end Tooling (Zabbix, Ansible and iAIOPs) Deployment for the Logistic Partner.
- Pivotal in Co-ordinating with the Procurement Team and the Service provider in ensuring the on-time delivery, racking and stacking of the devices with DC team support.
- Running 3 Projects in Cloud Hosting Tower from Planning, Execution and Monitoring control with the Zabbix, iAIOPS and Ansible Team.
- Interlocking with the SNOW Team to ensure smooth flow of alerts and tickets from the Tooling perspective.
- Supported in test case creation and end-end testing of the Alert generation, landing in Netcool, and getting routed to the right queue in SNOW.
- Instrumental in creating the Ticketing queues in SNOW working parallel with the SLM Team.
- Running to End-End Knowledge transfer across all towers to the BAU team and the customer team on the tools.
- Running the Demo sessions on the Tools to the customers.

**Aug 2020 – Nov 2024**

**Kyndryl / IBM**

**Chennai, INDIA**

**Technical Project Manager, Vodafone Cirrus**

Driving Infrastructure Projects across UKI and German Portfolio for different customers of Vodafone successfully with a good NPS Score winning the confidence of Clients and the Management.

#### Accomplishments

- Won a DNSO for a Business Lead worth 8000 Pounds.
- Have completed 48 RFS Projects across UKI and German Portfolio.
- 15 Projects were completed with a NPS score of 9 / 10.
- Have Completed **PM Associate Badge**.
- Have published 3 Papers on Agile and Psychology, Behavioral Theory based Agile Squads - enhancing education system using Agile and Transactional Analysis, Blind spots in Leadership, Nature to Nurture, and 1 Technical paper on Disaster recovery using AI Bots, which won the **3<sup>rd</sup> Prize on Call for Code event**.
- **Chennai Kyndryl Transition Core Team Member** as a stretched assignment

#### Tasks / Responsibilities

- Driving end-end Infrastructure projects, with Creation of VMs, Firewall rules, Installation of HW Devices, Configuring the Management Ports and taking them to live system in VGE Portfolio.
- Driving end-end ASA Migration, Colocation and Decommission Projects for accounts across UKI and German Portfolio for Vodafone Cirrus.
- Take part in the technical discussions for a project right from the RFS phase, Planning of the WBS, Procuring HW / Cabling, Interlocking with Stakeholders, vendors, Access Team, Customer, Communication, Stakeholder, Quality, Finance, Risk and Issues and Change Management, Reporting to stakeholders, Raising a PCR, when there's a deviation in the scope, Mitigation plans to bring the project back on track and bring it to closure.
- Key member of Procurement Guild, Communication Guild and White Paper board and drive them towards the respective goals.

**Jan 2016 – Jul 2020**

**IBM INDIA**

**Chennai, INDIA**

**Delivery Excellence Manager, Nordics Sector**

Driving a team of 8, on excelling the client delivery plan across 5 Europe clients, building stability of the environment, smooth flow of services, achieve their SLAs, and achieving a good CSAT / NP Score for IBM from delivery excellence perspective.

#### Accomplishments

- Deep dive analysis at Europe IMT level to reduce failed changes, MI /P1/ Outages, identify unique solutions and bring in cost savings. Brought in a cost saving of **0.3 million \$ (approx.)** with the SESDR cleanup project.
- Brought in a potential saving of **16 FTE** across SLs and **43** solutions accepted in GCH (Global Clearing House) and 6 solutions for CVR (client value recognition).
- **IBM Mentor Badge** awarded for coaching, mentoring and deploying agile methodology across **14** accounts in Europe with a potential saving of **43 %** Incident reduction and increase in change success rate by **13%**.
- **IBM Agile Champion Badge** issued for Conducting **14** Agile Workshops and assessments across all teams in Chennai location involving **700+** employees as give back.
- As an **Agile Project Manager**, improved the productivity of Nordics Accounts (APMM, Salling Group, Posti, Danske Bank, Schibsted) by **17%** with IRP (incident reduction plan) and ANSIBLE deployment.

#### Tasks / Responsibilities

- Driving agile transformation of accounts in Europe IMT, to achieve business results, client satisfaction and to improve process efficiency, productivity, reduction of cycle time and continual service improvement.

- Coached, mentored and trained the teams, scrum masters in agile principles and practices to identify EPICs, deploy agile framework (social contract, VSM, Sprints, Kanban boards, metrics) across accounts in Nordics geo to drive CSI projects.
- Train and mentor people to create a T-Skill environment to effective utilization of resources and support the accounts.
- Deploy dynamic automation project to reduce false alerts, improve the auto resolved percentage and increase operation efficiency.
- Deployed predictive business Insight and data science Initiatives, to transform the accounts towards Client Excellence.

**Jan 2013 – Jan 2016**  
**Quality Leader, Industrial Sector, North America**

**IBM INDIA**

**Chennai, INDIA**

Directed a team of 8 people on client centric quality across accounts using agile principles and practices, kanban, data analytics, and CPI for the infrastructure services.

#### Accomplishments

- Increased operation efficiency by **23 %** for ID Access Team - reduced waste by defining value stream mapping and kanban system with WIP limits.
- Effectively reduced **37 %** of outages/MIs, failed changes and other critical events at IMT Level and enabled service lines to service their customers better as per sector quality target.
- Responsible for improving the operation efficiency across the service lines and brought in a potential saving of **6** solutions accepted in GCH (Global Clearing House) and **2** solutions for CVR (Client Value Recognition), yielding a saving of **0.4** Million \$ (LUN Reclamation project) and replicated it across **7** accounts.
- Deployed dynamic automation, frequent analysis in an iterative manner and improved auto resolved tickets to **45 %** with new automata.
- Successfully deployed incident prediction model and backup failure prediction model in 4 accounts with an accuracy of **87%** and **73 %** each.

#### Tasks / Responsibilities

- Direct the team on client centric quality drives across accounts using account quality model, project quality analysis and CSAT/NPS Score for the Infrastructure Services provided by the Organization.
- Perform Incident and Change Data analysis, co-ordinate incident and change failure reduction to adhere to SLAs prepare trend charts for different categories, trigger RCA, derive meaningful results and predictions to the Sr.Management and customers.
- Streamlining customer support services to enhance effectiveness and achieving through data science initiatives and predictive business insight models.
- Pivotal in GDF audits, QMS Audits, ISO audits and trained two batches on GDF (PBA, DPP, Segmentation, VSM) and conducted agile workshops (Agile for Services and Development Teams)

**August 2007 – December 2012**  
**Senior Project Manager / Lead Consultant**

**Robert Bosch**

**Stuttgart, Germany/Coimbatore, India**

As a Senior Project Manager, direct a team of 11 professionals in executing harmonization and process release projects for organizational software systems supporting diesel and gasoline accounts. Apply the principles of the Software Development Life Cycle (SDLC) to ensure structured planning, design, development, testing, and deployment. Empower teams with the Agile Manifesto, support EPIC definition, establish SCRUM teams, facilitate agile ceremonies, and implement a robust review system to drive continuous improvement and delivery excellence.

#### Accomplishments

- Optimized the project management process and brought in annual savings of **0.5** Million \$.
- Derived a business of **1.75** million \$ and initiated offshore business consultancy for Bosch, India.
- Provided training for the global teams of 120 members and ensured process adherence for **ISO26262** functional safety audit.
- Imparted agile scrum training to DGS-EC and GS-TC teams for **400+** People.

**January 2004 – August 2007**  
**Technical Manager / Project Leader**

**Alcatel Lucent**

**Chennai, India**

As Technical Manager at ADCC, I led a team of 18 professionals to deliver end-to-end integrated Data Management System solutions, including the development and deployment of data load packages for the S12 Soft Switch. Applied the Waterfall Software Development Life Cycle (SDLC) methodology, ensuring structured phases of requirements gathering, design, development, testing, and implementation for successful project delivery.

#### Accomplishments

- Ideated an innovative incentive structure that improved performance/ productivity by **5 %**
- Effectively reduced the outage time by 10% during network updates for major telecom service providers in Europe.
- Performed root-cause analysis that triggered defect prevention actions saving **0.3 million \$** in the project cost.

**July 2002 – Dec 2003**  
**Build Configuration Manager**

**Alcatel**

**Stuttgart, Germany**

Created a team of 5 people and started software and data load packages merging and uploading in the model exchanges for the system and integration testing.

#### Accomplishments

- Took over the knowhow from Alcatel Germany in a short span of time, under a critical scenario and established a self-sufficient team in Alcatel India.

**February 1999 – June 2002**

**Alcatel**

**Antwerp, Belgium / Chennai, India**

**Software Engineer / Process Control Team Leader**

- Developed digital announcement solutions using AMADEUS tool and CHILL for Belgacom, Deutsch Telecom, SingTel and WR1A involved in design, development, testing and implementation of online data verification filters in C++ for Belgacom.
- Responsible for definition of process for new subsystems. Provided closure on quality audit gaps, trained the engineers on audit and steered the department towards CMM L3.

---

#### **EDUCATION**

- Master's in computer applications from University of Madras in 1998
- PG Diploma in Software Engineering, Software Solutions Integrated Pvt Ltd, 1998
- Bachelor's in computer science from Madurai Kamaraj University in 1995

---

#### **TECHNICAL AND FUNCTIONAL SKILLS**

- Agile - JIRA, Trello, D3, Mural
- Process Mgmt. – Project Kit, MS Excel, MS Visio, Watson, Power BI
- Defect /Progress Tracking Tools: Autotrac, Jira, Kanban
- Languages Known: German(A1, A2 – Completed, B1 – Lesen, Schreiben, Sprechen Completed), English and Tamil

---

#### **PROFESSIONAL CERTIFICATIONS AND AWARDS**

- **AZ -900 Azure Fundamentals** and **AWS Cloud Practitioner** Certified in 2022
- **Prince 2** Agile Practitioner in 2022
- **Agile Kanban Train the Trainer (AKT)** from Lean Kanban University, 2018
- **ICA Agile Certified Professional** in Agile Coaching, **Leading SAFE Course** (4.5) Certification by Scaled Agile
- **German A1, A2 Certification** from Goethe Institute, Chennai.
- Project Management Institute, Project Management **Professional (PMP)** (PMP No: 1263414), 2009. (PMP No: 3637794), 2023
- **Transactional Analysis Certification** from TA Study circle Chennai – 2007.
- **Managers Choice Award** for winning the Client Value Recognition for a banking account in Denmark.
- **Agile Nova Award** for exemplary performance in deploying Agile across Chennai based accounts.
- **Winner of Lustrum** award for completing 8 years of dedicated service with Alcatel-Lucent.

---

#### **COMMUNITY INVOLVEMENT**

- Co-Founder and Executive Manager of **Mitr**, a charity organization to support the education of underprivileged children.
- Core Team member of **IBM Runners club, Chennai**, where we encourage employees to lead a healthy life, as well as take part in Marathons, which contribute to education of Girl child, aid for differently abled people.
- Core-Team member of **IBM STEM Program**, design, deliver modules on soft skills, stress management and personality development for Govt school students as a part of the CSR activity.
- **Guest Speaker** in Colleges and Schools on Bridging between Colleges to corporates.
- **Guest Lectures** within IBM on different Forums promoting the language as a Key Skill in handling Customers.
- Freelance Transactional Analysis **Counsellor and Therapist**, treating Childhood, Marital, Adolescent, Substance abuse issues for the Clients.
